5. In Wales, Public Health Wales (<https://public.tableau.com/profile/public.health.wales.health.protection#!/vizhome/RapIDCOVID-19virology-Public/Headlinesummary>) has three criteria for a COVID-19 death:
  - Lab-confirmation: the person must have a positive test result for SARS-CoV-2.
  - Clinical suspicion: clinicians must suspect that COVID-19 was a causative factor in the death.
  - Location: the death must occur in a Welsh hospital or care home.
 For Scotland (<https://www.gov.scot/publications/coronavirus-covid-19-data-definitions-and-sources>)

and Northern Ireland ([https://www. publichealth.hscni.net/publications/covid-19-surveillance-reports](https://www.publichealth.hscni.net/publications/covid-19-surveillance-reports)), the measure is identical: deaths within 28 days of a positive test for SARS-CoV-2.
